

# Metallized Polyester Film Capacitors

**250V DC - Axial Type (PE) • Tolerance  $\pm 5\%$  @ 1KHz**

A range of high voltage metallized polyester film capacitors ideal for use in high-power, high-performance loudspeaker crossovers and for more general electronics applications.

Particularly suitable when very low DF (less than 1% @ 1KHz) and high current handling are important and when very small capacitance values are required.
